

Tridem Drive Straight Truck

- The Province has responded to a request from industry stakeholders and implemented a new vehicle category, tridem-drive straight truck with a maximum weight of 29,250 kgs. This configuration will require a permit for now but will eventually transition into regulation.

Amendment to the Existing Move-Over Law

- The Department has developed an amendment to the move-over law under the Highway Traffic Act that will now include tow trucks. This amendment has passed second reading in the legislature and is expected to receive royal assent.

Entry Level Truck Driver Training

- The Department has truck driver training and qualifications under review and has met with industry stakeholders as well as representatives from the Department of Workforce and Advanced Learning in a first step in assessing current requirements and where to from here.

Vehicle Weights and Dimensions Amendments

- The Department has approval to move into the development stage to prepare amendments to the Vehicle Weights and Dimensions Regulations that will align us with recent updates to the MoU.

Manager of Regulatory Programs

- The Department is pleased to announce that Patrick Dowling has been promoted on an acting basis to the role of Manager of Regulatory Programs and as such one of his responsibilities will become the vehicle weights and dimensions file.
